

GLOBAL COVERAGE FOR LUXURY PRODUCTS

AION

Embedded insurance, built to luxury standards

— MARKET CONTEXT

Luxury prices raised and customers want to **cover their products** today

Sustained price hikes have transformed luxury goods into genuine asset classes — customers now expect protection to match the value they carry.

Source: Mulberry; HSBC

50%+

increase in luxury product prices since
2020, becoming an asset class for
customers

— THE PROBLEM

Traditional insurances offer solutions **far from** customer needs

Limited coverage

Theft only — no accidental damage — and limited to select geographies.

Lengthy onboarding

Multiple forms to fill in, plus a manual estimate of item value required.

High premium

Premium often exceeds 5% of the item's retail price per year.

The result? Customers go uninsured — or overpay for inadequate cover.

— BRAND CHALLENGE

Luxury brands strive to collect customer data and build loyalty

The top 5% of luxury consumers drive 40% of the market. Brands fight to stay top of mind and capture share of wallet — with very few tools to do so post-purchase.

Top 5%

of luxury consumers drive 40% of the market, with brands fighting to stay top of mind

— THE SOLUTION

AION is the solution: **embedded insurance** for luxury products

- B Brands build loyalty and collect data**
A seamless touchpoint post-purchase that keeps brands relevant and gathers first-party customer data.
- C Customers wear with peace of mind**
Global coverage against theft and accidental damage, included in the retail price at checkout.
- ✓ A true win-win**
Brands grow loyalty and revenue. Customers gain protection. Insurers gain distribution.

— CASE STUDY

Roberto Coin pioneered **Prestige Service** in partnership with AION

ROBERTO COIN

Prestige Service

"An innovative service offering our customers the utmost care and honoring the beauty of jewels by protecting them."

Valid for two years from purchase. Applies to jewelry between €1,000 and €100,000 VAT included. Currently active in Rome & Venice boutiques.

Full API-based integration

Zero operational breakages since launch.

Double-digit registration uplift

Client feedback confirms significant increase in customer registration rate.

In-store validation

"The service is well perceived and helps conversion."
— Store feedback

— BUSINESS MODEL

Revenue model built on 3 core fees

Brokerage

Fee paid by the insurance to connect with brands and negotiate terms of the contract. This is a % of the value insured.

0.2–0.4%
of GMV

Software License

Fee paid by the brand to distribute coverage services. Monthly fee + a % of the value insured.

0.1–0.2%
of GMV

Software Set up

One-off fee paid by the brand to activate the software and launch the programme. Fixed fee based on effort.

— UNIT ECONOMICS

Unit economics show 74% gross margin at scale

Simulation of 2-year premium on a €3,500 product at 0.32% average take rate across brokerage and platform fee.

AION Brokerage Fee	+ €7.10
AION SaaS Fee	+ €4.00
Claim cost	- €0.73
Tech cost	- €0.40
Insurance cost	- €1.84
AION Margin	€8.13

Note: AION at scale has 26% of direct costs for claim management, tech, and insurance (incl. brokers).

74%

Gross margin at scale

MARKET OPPORTUNITY

Market is big and untapped

- Luxury market expected to grow over 50% by 2030 to more than €1.5 trillion.
- Brands increasingly focused on offering unique experiences — cit. Andrea Guerra, CEO of Prada.
- Over 75% of Gen Z and Millennials willing to purchase embedded insurance on their products.
